DETAILED ACTION

This action is in response to Applicant's amendment filed 2-10-03. Claims 1-3 and 15-18 have been amended. Claim 8 has been canceled. Claims 1-7 and 9-21 are pending in this application. Claims 6, 7, 9-14 and 19-21 are withdrawn from consideration.

The rejections under 35 U.S.C. 112 have been overcome with Applicant's amendments.

The rejections under 35 U.S.C. 102 and 35 U.S.C. 103 have been maintained.

The claim objections have been overcome with Applicant's amendments.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1-5, and 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Booth, et al. (*J Chem Soc Perkin Trans 1*, 1987) for the reasons of record in the Office Action mailed 11-18-02.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the

subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-5 & 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Booth et al., (*J Chem Soc Perkin Trans 1*, 1987) for the reasons of record in the Office Action mailed 11-18-02.

Response to Arguments

Applicant's arguments filed 2-10-03 have been fully considered but they are not persuasive with respect to the rejections under 35 U.S.C. 102 and 103. Applicant argues that the present invention was carried out at pH 13 or more since the process involved the use of 1-10 moles of the basic compound (sodium hydroxide or potassium hydroxide) per mole of the compound represented by formula (II). After the reaction, the reaction solution pH was then adjusted to the isoelectric point or to 9-13 to precipitate crystal. So the present invention is different than the disclosure of the Booth reference, even if the pH range of 10-11 mentioned in the reference happens (to) be inclusive of the pH range of 9-13 for the present invention's post reaction adjustment.

However, it is obvious to adjust the amount of base added and to change the times during the reaction that base is added to modify the pH and therefore optimize the reaction. Motivation to modify the existing procedure is provided in Booth et al. on page 1522, in the left column, lines 4-7. Also see the example shown in Booth et al. on page 1524, fourth paragraph down, left-hand column.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
